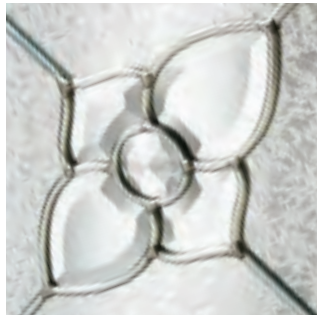
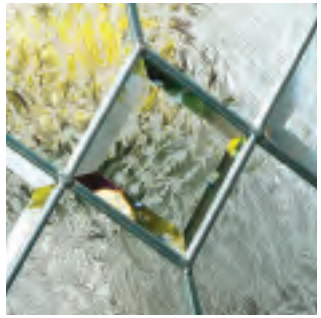
The Yorkshire Country Collection





CHOOSING A DOOR TO YOUR HOME SHOULD BE DONE WITH CARE AND CONSIDERATION. IT WILL BE WITH YOU FOR MANY YEARS TO COME AND SO, NEEDS TO BE SOMETHING OF WHICH YOU ARE PROUD OF AND COMFORTABLE TO LIVE WITH.

It needs to be attractive, strong and secure, weather-repellent and give outstanding insulation. Add to that the ease of cleaning, and with a surface that will withstand life's trials, tribulations, and general wear and tear, and you will have a door that is right for you.

Whatever we say, we do judge a book by its cover, and we will all be judged by the door to our home.

While modern entrance doors are constructed of many and varied materials, there is only one that provides the look and feel of timber but has none of the inherent problems. Our doors have the ability to display timber-like graining with attractive depression mouldings and panels, while offering modern day colours that are hard wearing, providing you with a door you can rely on.

This door's good looks can be further enhanced by choosing a decorative glass that complements, or even contrasts, with the door colour. The ranges of glass that are available for each door style are clearly shown in this brochure. Whether you want subtle or striking: clear or coloured glass, and varieties of opacity to provide privacy to a level you require, there is a choice for you.

Sit down, and browse for your next door. It may be for the front of the house where you want it to make a statement, while providing privacy, or for a back door to give visibility on to your garden, or provide more light into a kitchen or passageway. Whatever your need, there is a wide choice of door styles and decorative glass that can enhance your feeling of wellbeing.

OUR DOORS

The choice you make in selecting your new insulated composite door is important. So what do you want from your door? We've looked at the most common requirements and have listed them here for you, as a check list:

SECURITY

Important in protecting your home from intruders. You need:

- Impact resistant GRP with rigid polymer subframe
- High-density polyurethane foam core
- Proven to PAS24 Security standard, essential for achieving 'Secured by Design' endorsement
- High Security 2-Hook Locking system as standard (4-Hook Upgrade available).
- Anti-Bump, Pick and Drill barrel which has achieved TS007 / Sold Secure Diamond Grade and Secured By Design accreditation.

WEATHERPROOF

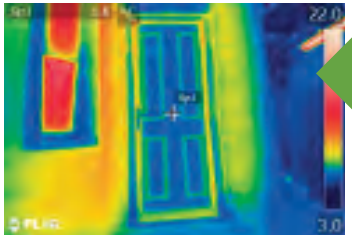
A must to keep the elements at bay! It must have:

- A waterproof door leaf
- A high performance, weather resistant, glazing system
- Weather performance, proven to BS6375 - 1 Classification, for weather tightness, air, wind and water

HEAT INSULATION

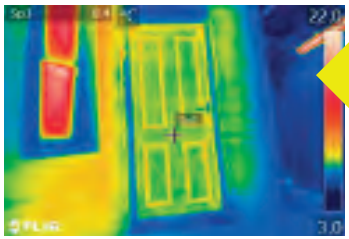
Keeping your home insulated and your bills down. You require:

- A high performance insulating core
- High performance insulated glass units
- A door that exceeds Approved Document L of the Building Regulation requirements



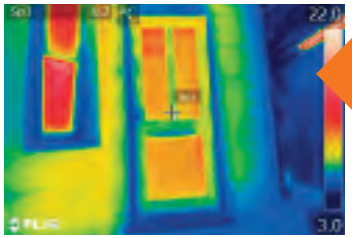
Our 44.5mm GRP Composite Door

As tested by The University of Salford at their 'Energy House' test facility.



48mm Solid Timber Core Composite Door

Our Door is 19% more thermally efficient than a 48mm Solid Timber Core Composite Door.



44mm Traditional Timber Panelled Door

Our Door is 17% more thermally efficient than a 44mm Traditional Timber Panelled Door.

SOUND INSULATION

Protecting you from external noise. It must have:

- Baffling against noise with a high performance insulating core
- At least Outdoor-Indoor Transmission Class (OITC): 26db
- At least Sound Transmission Class (STC): 29db

DURABILITY

A door with pedigree - tried and tested for over 20 years. It needs:

- Strength from its construction
- High impact resistant door skins
- Stability, whatever the weather conditions

APPEARANCE

Your door must look good and be aesthetically pleasing. Think about:

- Door Style
- Door Colour
- Choice of Decorative Glass

ENCLOSED MINI BLIND

The Practical and Attractive Way to Control Light with Style

They have all the advantages of traditional 'exposed' mini blinds, providing excellent light control, UV control and privacy but none of the hassles. The two panes of toughened safety glass are held in an aluminium frame that never needs painting. These totally enclose the blind and help aid allergen control while protecting the blind and mechanism so that no dusting or cleaning of the shutters is necessary.

A safety feature for children is that there are no exposed cords, as the blind is raised and lowered by one magnetic tab, while the other controls the tilt...all the privacy without the need for opaque glass.

SIDE PANELS

When You Need More Than Just a Door

For customers who wish to have a single or a pair of sidelights that truly match their GRP composite door, we offer a composite side panel solution with all the benefits of the composite door - colour, style, security, sound and heat insulation. The glass ranges featured in this brochure are suitable for matching composite sidelights for our Ripon, Fulford, Harrogate or Boston doors only.

STABLE DOORS

Let the Summer Breeze Flow Through Your Home

The Stable door is the ideal solution for a back door, yet is the perfect choice for a front door too. You can open the top to bring light into your home while still keeping children in - or animals out!

The Stable door we offer is constructed specifically with a mid-rail so that when cut through, it forms two leafs. Each leaf is completely surrounded by a rigid subframe providing stability and security, as well as weather protection.

* Please Note: The stable door uses the Rothbury Cottage Slab not the Wetherby Slab - there will be no border.

FRENCH DOORS

They are designed to make the most of your home, both inside and out, as they bring the sunshine indoors by giving an airy feel and rooms filled with light. Both are perfect entertaining.

Double Door options are also available using any slab from brochure. Pull Bar handle option also available.

HARDWARE

Whatever 'Suits' You

We offer a range of 'suited' door furniture in a choice of colour finishes to add that final finishing touch to your composite door.

TECHNICAL INFORMATION

Care and Maintenance of your Composite Door

Your new insulated composite door is strong, durable and secure, and manufactured to an exacting and high quality specification. It's strength comes from the construction of its sub-frame in solid, water-resistant polymer material, reinforced behind with Laminated Veneered Lumber (LVL). The thermoset GRP skins are then bonded to this sub frame, and its core filled with high density, 100% CFC-free polyurethane foam.

The thermoset GRP skins are depression moulded featuring a lifelike grain effect and high definition panels providing an authentic timber like door with all the advantages but limited maintenance. Thermoset GRP cannot expand or contract laterally such that the door cannot increase or decrease in size, an advantage over other commonly used materials.

The factory finish colours of White, Black, Blue, Green, Red, Anthracite Grey and Chartwell Green have pre-pigmented GRP skins which are over-sprayed with a UV stable paint.

The doors' insulation properties are excellent in both sound reduction and heat retention. In the case of sound this is particularly helpful in reducing traffic noise, with its high level of thermal insulation, outperforms both timber and PVC-u doors. This insulation contributes to the general energy efficiency of your home, and savings to your bills.

This insulated composite door is environmentally friendly as it rates low in both Global Warming Potential and Ozone Depletion.

This is a door that's well insulated, made to last, looks good, protects your home from both intruders and the elements and will serve you well for many years to come.

- 44.5mm thick door with 7 pre-pigmented colours and 2 wood stains
- Thermoset GRP skins are impact resistant, will not expand, contract or crack
- Proven to PAS 24 and Secured by Design (SBD), the official UK Police initiative supporting 'designing out crime'
- Excellent thermal performance, with an average door leaf centre pane U-Value of 0.6 W/mtr^2/K
- Sound Transmission Class (STC): 29db
- Doorsets conform to UK Building Regulation minimum U Value requirements of 1.6 W/mtr^2/K
- Door leaf manufactured to the UK Q-marked quality scheme
- Global Warming Potential (GWP) score of less than 5
- Ozone Depletion Potential (ODP) score zero

Customer care and maintenance of your insulated composite door

To prolong the life of the surface finish and protect your warranty, it is recommended that your door is regularly cleaned by washing with warm soapy water (washing up liquid is suitable) using a soft, lint free cloth. Cleaning may need to be more frequent if your location is coastal, heavily industrialised or near a main road.

Important - do not:

- Use abrasive cleaners or scouring pads on the surface of the door
- Use high pressure or steam cleaners
- Use any type of bleach, solvent (eg white spirit, methylated spirit, cellulose thinners or acetone/nail varnish remover)
- Use adhesives of any type or tack for providing temporary protection or fixing of seasonal or other decorations etc.

Due to the limitations in photographic and printing processes, actual colours may vary from those illustrated in this brochure and should be used for guidance purposes only. We reserve the right to alter specifications without prior notice. Glass photography supplied courtesy of RegaLead Limited and Distinction Doors LImited. Door photography supplied courtesy of Distinction Doors Limited.
